

# PHYSICS- USPEKHI

English edition of *Uspekhi Fizicheskikh Nauk*  
April 2002 Volume 172 Number 4

## Contents

**Volume 45**  
**Number 4**  
**2002**  
**Pages 347–454**

### REVIEWS OF TOPICAL PROBLEMS

- Two-dimensional QCD in the Coulomb gauge** 347  
Yu S Kalashnikova, A V Nefed'ev
- Carbon nanotubes and their emission properties** 369  
A V Eletskii
- Superhigh-energy cosmic ray detection using shower radioemission** 403  
A D Filonenko

### CONFERENCES AND SYMPOSIA

- Special Scientific Session of the Division of General Physics and Astronomy of the Russian Academy of Sciences, celebrating the 40th anniversary of the discovery of high-density silica (stishovite) (31 October 2001):** 433
- The discovery story** 433  
S M Stishov
- Stishovite and its implications in geophysics: new results from shock-wave experiments and theoretical modeling** 435  
S-N Luo, J L Mosenfelder, P D Asimow, T J Ahrens
- Minerals of the deep geospheres** 439  
D Yu Pushcharovskii
- Hydrothermal growth of stishovite (SiO<sub>2</sub>)** 444  
N A Bendeliani
- Temperature-induced solid-phase amorphization of stishovite** 445  
S V Popova, V V Brazhkin, R N Voloshin, M Grimsditch

*Continued overleaf*

*Contents continued*

<b>Elastic moduli and the mechanical properties of stishovite single crystals</b>	447
V V Brazhkin, M Grimsditch, I Guedes, N A Bendeliani, T I Dyuzheva, L M Lityagina	

PERSONALIA

<b>In memory of Vladimir Grigor'evich Firsov</b>	449
V A Gordeev, V I Grafutin, M V Danilov, G V Danilyan, A V Davydov, F S Dzheparov, G A Leksin, B A Nikol'skiĭ, L B Okun', L I Ponomarev, A L Suvorov, Yu V Terekhov	

BIBLIOGRAPHY

<b>New books on physics and related sciences</b>	451
E V Zakharova	
<b>Physics news on the Internet</b>	454
Yu N Eroshenko	

# Contents

<b>Two-dimensional QCD in the Coulomb gauge</b> Yu S Kalashnikova, A V Nefed'ev	347
<b>Carbon nanotubes and their emission properties</b> A V Eletskii	369
<b>Superhigh-energy cosmic ray detection using shower radioemission</b> A D Filonenko	403
<b>Special Scientific Session of the Division of General Physics and Astronomy of the Russian Academy of Sciences, celebrating the 40th anniversary of the discovery of high-density silica (stishovite) (31 October 2001):</b>	433
<b>The discovery story</b> S M Stishov	433
<b>Stishovite and its implications in geophysics: new results from shock-wave experiments and theoretical modeling</b> S-N Luo, J L Mosenfelder, P D Asimow, T J Ahrens	435
<b>Minerals of the deep geospheres</b> D Yu Pushcharovskii	439
<b>Hydrothermal growth of stishovite (SiO<sub>2</sub>)</b> N A Bendeliani	444
<b>Temperature-induced solid-phase amorphization of stishovite</b> S V Popova, V V Brazhkin, R N Voloshin, M Grimsditch	445

◇ ◇ ◇

## In the next issue

*Baryons with two heavy quarks*  
V V Kiselev, A K Likhoded

*Multiparticle production and quantum chromodynamics*  
I M Dremin

*Kinetic coefficients in isotopically disordered crystals*  
A P Zhernov, A V Inyushkin

*Dipole-wave theory of electromagnetic diffraction*  
V G Niz'ev

*University laboratory measurement of the gravitational constant*  
N S Stepanov, A V Shisharin

*Personalia*  
*Physics news on the Internet*
