

PHYSICS- USPEKHI

English edition of *Uspekhi Fizicheskikh Nauk*
April 2004 Volume 174 Number 4

Contents

Volume 47
Number 4
2004
Pages 325–426

REVIEWS OF TOPICAL PROBLEMS

Integrability properties of high energy dynamics in the multi-color QCD 325
L N Lipatov

Photonuclear experiments with Compton-backscattered gamma beams 341
V G Nedorezov, A A Turlin, Yu M Shatunov

Feasibility of spherical fusion target compression under two-beam laser irradiation 359
V B Rozanov

Scanning tunneling microscopy studies of III-nitride thin film heteroepitaxial growth 371
R Z Bakhtizin, Q-Zh Xue, Q-K Xue, K-H Wu, T Sakurai

METHODOLOGICAL NOTES

What are the left-handed media and what is interesting about them? 393
K Yu Bliokh, Yu P Bliokh

CONFERENCES AND SYMPOSIA

Strongly correlated electron systems and quantum critical phenomena (11 April 2003, Troitsk, Moscow Region) 401
S V Demishev, V N Ryzhov, S M Stishov

Continued overleaf

Joint scientific session of the Physical Sciences Division of the Russian Academy of Sciences and the Joint Physical Society of the Russian Federation (24 September 2003):	409
Generalizing considerations about the nature of high-temperature superconductivity (based on the proceedings of M2S-HTSC-VII) V I Belyavskii, Yu V Kopaev	409
Phase transitions and the giant magnetoelectric effect in multiferroics A K Zvezdin, A P Pyatakov	416
 PERSONALIA	
Evgenii Akimovich Turov (on his eightieth birthday) A F Andreev, V G Bar'yakhtar, Yu V Gulyaev, Yu A Izyumov, Yu M Kagan, M I Kurkin, G A Mesyats, M V Sadovskii, V M Schastlivtsev, V V Ustinov, V A Chereshev, V E Shcherbinin	423
Physics news on the Internet Yu N Eroshenko	425
