Pages 977–1082

REVIEWS OF TOPICAL PROBLEMS

Study of layered superconductors in the theory of an electron–phonon coupling mechanism 977
I N Askerzade

Research on phase transformations in 3d-metal oxides at high and ultrahigh pressure: state of the art 989
I S Lyubutin, A G Gavriiliuk

Fractional differential approach to dispersive transport in semiconductors 1019
R T Sibatov, V V Uchaikin

METHODOLOGICAL NOTES

Mass transport thermodynamics in nonisothermal molecular liquid mixtures 1045
S N Semenov, M E Schimpf

CONFERENCES AND SYMPOSIA

Prospects for the development of fundamental physics and astronomy 1055
(Scientific session of the general meeting of the Physical Sciences Division of the Russian Academy of Sciences, 15 December 2008):
