

**УСПЕХИ ФИЗИЧЕСКИХ НАУК****БИБЛИОГРАФИЯ**

**Годовой тематический указатель  
к журналу "Успехи физических наук" — том 185, 2015 г.,  
составленный в соответствии с международной классификацией  
по физике и астрономии (PACS 2010)**

DOI: 10.3367/UFNr.0185.201512I.1353

**00. GENERAL****01. Communication, education, history, and philosophy**

**01.10. – m Announcements, news, and organizational activities**  
77, 89, 97, 103, 501, 502, 507, 515, 521, 531, 540,  
549, 553, 631, 632, 643, 649, 655, 664, 947, 948,  
964, 970, 1063, 1064, 1077, 1089, 1099

01.10.Cr Announcements, news, and awards 1049

01.10.Fv Conferences, lectures, and institutes 77, 89, 97,  
103, 501, 502, 507, 515, 521, 531, 540, 549, 553,  
631, 632, 643, 649, 655, 664, 947, 948, 964, 970,  
1049, 1063, 1064, 1077, 1089, 1099

**01.30. – y Physics literature and publications** 441

01.30.Bb Publications of lectures (advanced institutes,  
summer schools, etc.) 501, 502, 1049, 1050, 1059

01.30.Tt Bibliographies 111, 223, 559, 1007, 1347

**01.60. + q Biographies, tributes, personal notes, and obituaries**  
221, 447, 501, 507, 557, 1005, 1345

**01.65. + g History of science** 441, 501, 502, 507, 631, 632, 981,  
1003, 1061

**01.90. + g Other topics of general interest** 112, 180, 332, 414,  
500, 630, 784, 884, 946, 1048, 1202, 1336

**02. Mathematical methods in physics**

**02.30. – f Function theory, analysis** 1129

02.30.Em Potential theory 333

02.30.Hq Ordinary differential equations 333

**02.60. – x Numerical approximation and analysis**

02.60.Pn Numerical optimization 1129

**03. Quantum mechanics, field theories, and special relativity**

**03.30. + p Special relativity** 431, 895, 1229

**03.50. – z Classical field theories**

03.50.De Classical electromagnetism, Maxwell equations  
917

**03.65. – w Quantum mechanics**

03.65.Pm Relativistic wave equations 845

03.65.Sq Semiclassical theories and applications 3

**03.70. + k Theory of quantized fields** 1271

**03.75. – b Matter waves** 307

**04. General relativity and gravitation**

**04.20. – q Classical general relativity** 947, 948, 1225

04.20.Cv Fundamental problems and general formalism 561

**04.60. – m Quantum gravity** 947, 948

**04.70. – s Physics of black holes**

04.70.Bw Classical black holes 561

**05. Statistical physics, thermodynamics, and nonlinear dynamical systems**

**05.20. – y Classical statistical mechanics**

05.20.Jj Statistical mechanics of classical fluids 773

**05.40. – a Fluctuation phenomena, random processes, noise, and Brownian motion** 271, 981, 1003

05.40.Fb Random walks and Levy flights 773

**05.45. – a Nonlinear dynamics and chaos** 1337, 1339, 1342

**05.60. – k Transport processes**

05.60.Gg Quantum transport 1271

**07. Instruments, apparatus, and components common to several branches of physics and astronomy**

**07.55. – w Magnetic instruments and components**

07.55.Db Generation of magnetic fields; magnets 631, 643

**07.60. – j Optical instruments and equipment** 1203

**07.77. – n Atomic, molecular, and charged-particle sources and detectors**

07.77.Gx Atomic and molecular beam sources and detectors  
717

**07.85. – m X- and  $\gamma$ -ray instruments**

07.85.Qe Synchrotron radiation instrumentation 917

**07.87. + v Spaceborne and space research instruments, apparatus, and components (satellites, space vehicles, etc.)** 631, 664

**10. THE PHYSICS OF ELEMENTARY PARTICLES AND FIELDS****11. General theory of fields and particles**

**11.10. – z Field theory**

11.10.Wx Finite-temperature field theory 1271

**11.15. – q Gauge field theories** 1049, 1059, 1061

- 11.27. + d Extended classical solutions; cosmic strings, domain walls, texture** 947, 970
- 11.30. – j Symmetry and conservation laws**
- 11.30.Er Charge conjugation, parity, time reversal, and other discrete symmetries 1179
- 11.80. – m Relativistic scattering theory** 65
- 12. Specific theories and interaction models; particle systematics**
- 12.10. – g Unified field theories and models** 1241
- 12.15. – y Electroweak interactions** 1049, 1050, 1059, 1061
- 12.20. – m Quantum electrodynamics** 77, 103, 845
- 12.38. – t Quantum chromodynamics** 1241
- 12.60. – i Models beyond the standard model** 1179, 1241
- 13. Specific reactions and phenomenology**
- 13.75. – n Hadron-induced low- and intermediate-energy reactions and scattering (energy  $\leq 10$  GeV)**
- 13.75.Cs Nucleon-nucleon interactions (including antineutrons, deuterons, etc.) 1043
- 13.85. – t Hadron-induced high- and super-high-energy interactions (energy  $> 10$  GeV)**
- 13.85.Dz Elastic scattering 65
- 13.85.Lg Total cross sections 1043
- 14. Properties of specific particles**
- 14.20. – c Baryons (including antiparticles)**
- 14.20.Dh Protons and neutrons 65, 1043, 1179
- 14.60. – z Leptons**
- 14.60.St Non-standard-model neutrinos, right-handed neutrinos, etc. 1179
- 14.65. – q Quarks**
- 14.65.Ha Top quarks 1241
- 14.80. – j Other particles (including hypothetical)**
- 14.80.Bn Standard-model Higgs bosons 1049, 1050
- 25. Nuclear reactions: specific reactions**
- 25.60. – t Reactions induced by unstable nuclei**
- 25.60.Pj Fusion reactions 501, 507
- 29. Experimental methods and instrumentation for elementary-particle and nuclear physics**
- 29.20. – c Accelerators** 501, 515, 549
- 29.20.D– Cyclic accelerators and storage rings 501, 540
- 29.27. – a Beams in particle accelerators** 501, 553
- 29.40. – n Radiation detectors**
- 29.40.Ka Cherenkov detectors 501, 502, 515, 521, 531, 540, 549
- 30. ATOMIC AND MOLECULAR PHYSICS**
- 32. Atomic properties and interactions with photons**
- 32.80. – t Photoionization and excitation**
- 32.80.Fb Photoionization of atoms and ions 3
- 32.80.Rm Multiphoton ionization and excitation to highly excited states 3
- 32.80.Wr Other multiphoton processes 3
- 33. Molecular properties and interactions with photons**
- 33.20. – t Molecular spectra**
- 33.20.Fb Raman and Rayleigh spectra (including optical scattering) 501, 540
- 33.80. – b Photon interactions with molecules** 207, 717
- 34. Atomic and molecular collision processes and interactions**
- 34.10. + x General theories and models of atomic and molecular collisions and interactions (including statistical theories, transition state, stochastic and trajectory models, etc.)** 479
- 34.35. + a Interactions of atoms and molecules with surfaces** 981, 1003
- 34.80. – i Electron and positron scattering**
- 34.80.Qb Laser-modified scattering 3
- 36. Exotic atoms and molecules; macromolecules; clusters**
- 36.40. – c Atomic and molecular clusters** 619, 717
- 40. ELECTROMAGNETISM, OPTICS, ACOUSTICS, HEAT TRANSFER, CLASSICAL MECHANICS, AND FLUID DYNAMICS**
- 41. Electromagnetism; electron and ion optics**
- 41.20. – q Applied classical electromagnetism** 631, 643
- 41.20.Jb Electromagnetic wave propagation; radiowave propagation 181, 885
- 41.50. + h X-ray beams and X-ray optics** 393
- 41.60. – m Radiation by moving charges** 885, 917
- 41.60.Bq Cherenkov radiation 501, 502, 515, 531, 549, 553
- 41.75. – i Charged-particle beams**
- 41.75.Ak Positive-ion beams 753
- 41.75.Ht Relativistic electron and positron beams 501, 553
- 41.75.Jv Laser-driven acceleration 77, 89
- 41.85. – p Beam optics**
- 41.85.Ar Particle beam extraction, beam injection 753
- 42. Optics**
- 42.25. – p Wave optics** 77, 97
- 42.25.Bs Wave propagation, transmission and absorption 181, 885
- 42.30. – d Imaging and optical processing** 1203
- 42.30.Wb Image reconstruction; tomography 181
- 42.40. – i Holography** 393
- 42.50. – p Quantum optics** 307
- 42.62. – b Laser applications** 77, 97, 207, 717, 817, 1063, 1064
- 42.62.Fi Laser spectroscopy 717
- 42.65. – k Nonlinear optics**
- 42.65.Re Ultrafast processes; optical pulse generation and pulse compression 77, 97, 103
- 42.72. – g Optical sources and standards**
- 42.72.Bj Visible and ultraviolet sources 853
- 42.79. – e Optical elements, devices, and systems** 1203
- 42.79.Pw Imaging detectors and sensors 1031
- 42.81. – i Fiber optics** 371, 501, 553

**43. Acoustics****43.10. – a General**

43.10.Df Other acoustical societies and their publications, online journals, and other electronic publications 1235

43.10.Pr Information technology, internet, nonacoustical devices of interest to acoustics 1235

**43.20. + g General linear acoustics**

43.20.Gp Reflection, refraction, diffraction, interference, and scattering of elastic and poroelastic waves 181

**45. Classical mechanics of discrete systems****45.20. – d Formalisms in classical mechanics 333, 335**

45.20.D– Newtonian mechanics

45.20.dh *Energy conservation* 335

45.20.Jj Lagrangian and Hamiltonian mechanics 335

**45.40. – f Dynamics and kinematics of rigid bodies 1337, 1339, 1342**

**45.50. – j Dynamics and kinematics of a particle and a system of particles 333, 335**

**47. Fluid dynamics****47.10. – g General theory in fluid dynamics 213**

47.10.A– Mathematical formulations 561

47.10.ad *Navier-Stokes equations* 561, 593

**47.15. – x Laminar flows 619**

**47.27. – i Turbulent flows 213, 217, 271**

47.27.Ak Fundamentals 213, 217

47.27.Gs Isotropic turbulence; homogeneous turbulence 213

47.27.Jv High-Reynolds-number turbulence 593

47.27.N– Wall-bounded shear flow turbulence 217

**47.32. – y Vortex dynamics; rotating fluids**

47.32.C– Vortex dynamics 1129

**47.53. + n Fractals in fluid dynamics 271**

**47.85. – g Applied fluid mechanics**

47.85.L– Flow control 619

**50. PHYSICS OF GASES, PLASMAS, AND ELECTRIC DISCHARGES****52. Physics of plasmas and electric discharges****52.25. – b Plasma properties**

52.25.Jm Ionization of plasmas 753

**52.27. – h Basic studies of specific kinds of plasmas**

52.27.Lw Dusty or complex plasmas; plasma crystals 161, 613

**52.30. – q Plasma dynamics and flow 613**

**52.35. – g Waves, oscillations, and instabilities in plasmas and intense beams 77, 89, 113, 161**

52.35.Mw Nonlinear phenomena: waves, wave propagation, and other interactions (including parametric effects, mode coupling, ponderomotive effects, etc.) 613

**52.38. – r Laser-plasma interactions**

52.38.Kd Laser-plasma acceleration of electrons and ions 77, 89

**52.40. – w Plasma interactions (nonlaser)**

52.40.Kh Plasma sheaths 753

**52.50. – b Plasma production and heating**

52.50.Jm Plasma production and heating by laser beams (laser-foil, laser-cluster, etc.) 77

**52.59. – f Intense particle beams and radiation sources**

52.59.Bi Grid- and ion-diode-accelerated beams 753

52.59.Sa Space-charge-dominated beams 753

**52.65. – y Plasma simulation 753**

52.65.Rr Particle-in-cell method 77, 103

52.65.Vv Perturbative methods 161

**52.80. – s Electric discharges**

52.80.Mg Arcs; sparks; lightning; atmospheric electricity 1333

52.80.Qj Explosions; exploding wires 1333

**52.90. + z Other topics in physics of plasmas and electric discharges 161**

**60. CONDENSED MATTER: STRUCTURAL, MECHANICAL, AND THERMAL PROPERTIES****61. Structure of solids and liquids; crystallography**

**61.05. – a Techniques for structure determination 393**

61.05.C– X-ray diffraction and scattering 449, 897

61.05.F– Neutron diffraction and scattering 353

**61.30. – v Liquid crystals**

61.30.Cz Molecular and microscopic models and theories of liquid crystal structure 947, 964

**61.43. – j Disordered solids**

61.43.Hv Fractals; macroscopic aggregates (including diffusion-limited aggregates) 35

**61.46. – w Structure of nanoscale materials**

61.46.Df Structure of nanocrystals and nanoparticles ("colloidal" quantum dots but not gate-isolated embedded quantum dots) 35

**61.50. – f Structure of bulk crystals**

61.50.Ks Crystallographic aspects of phase transformations; pressure effects 1215

**61.66. – f Structure of specific crystalline solids**

61.66.Dk Alloys 353

**61.72. – y Defects and impurities in crystals; microstructure**

61.72.Dd Experimental determination of defects by diffraction and scattering 897

61.72.Ff Direct observation of dislocations and other defects (etch pits, decoration, electron microscopy, X-ray topography, etc.) 897

**61.80. – x Physical radiation effects, radiation damage**

61.80.Cb X-ray effects 885

**62. Mechanical and acoustical properties of condensed matter**

**62.20. – x Mechanical properties of solids**

62.20.D– Elasticity

62.20.de *Elastic modul* 35, 1215

**62.23. – c Structural classes of nanoscale systems**

62.23.Pq Composites (nanosystems embedded in a larger structure) 35

**62.50. – p High-pressure effects in solids and liquids 1215**

**63. Lattice dynamics**

**63.20. – e Phonons in crystal lattices 353**

#### 64. Equations of state, phase equilibria, and phase transitions

##### 64.30. – t Equations of state of specific substances

64.30.Ef Equations of state of pure metals and alloys 1215

##### 64.70. – p Specific phase transitions

64.70.M – Transitions in liquid crystals 947, 964

#### 67. Quantum fluids and solids

##### 67.25. – k $^4\text{He}$

67.25.D – Superfluid phase

67.25.dk *Vortices and turbulence* 947, 970

##### 67.30. – n $^3\text{He}$

67.30.H – Superfluid phase of  $^3\text{He}$

67.30.he *Textures and vortices* 947, 970

##### 67.80. – s Quantum solids 1163

##### 67.85. – d Ultracold gases, trapped gases 785

#### 68. Surfaces and interfaces; thin films and nanosystems (structure and nonelectronic properties)

##### 68.35. – p Solid surfaces and solid-solid interfaces: structure and energetics

68.35.B – Structure of clean surfaces (and surface reconstruction) 947, 964

##### 68.55. – a Thin film structure and morphology

68.55.A – Nucleation and growth 143

##### 68.65. – k Low-dimensional, mesoscopic, nanoscale and other related systems: structure and nonelectronic properties 449

#### 70. CONDENSED MATTER: ELECTRONIC STRUCTURE, ELECTRICAL, MAGNETIC, AND OPTICAL PROPERTIES

#### 71. Electronic structure of bulk materials

##### 71.38. – k Polarons and electron-phonon interactions 317

#### 72. Electronic transport in condensed matter

##### 72.10. – d Theory of electronic transport; scattering mechanisms

72.10.Bg General formulation of transport theory 941, 1271

##### 72.15. – v Electronic conduction in metals and alloys

72.15.Gd Galvanomagnetic and other magnetotransport effects 479

72.15.Jf Thermoelectric and thermomagnetic effects 479

##### 72.20. – i Conductivity phenomena in semiconductors and insulators

72.20.My Galvanomagnetic and other magnetotransport effects 479

72.20.Pa Thermoelectric and thermomagnetic effects 479

##### 72.80. – r Conductivity of specific materials

72.80.Tm Composite materials 225

#### 73. Electronic structure and electrical properties of surfaces, interfaces, thin films, and low-dimensional structures

##### 73.20. – r Electron states at surfaces and interfaces

73.20.Mf Collective excitations (including excitons, polarons, plasmons and other charge-density excitations) 337

##### 73.22. – f Electronic structure of nanoscale materials and related systems

73.22.Pr Electronic structure of graphene 845

##### 73.23. – b Electronic transport in mesoscopic systems 941

##### 73.43. – f Quantum Hall effects

73.43.Lp Collective excitations 337

##### 73.61. – r Electrical properties of specific thin films

73.61.Ph Polymers; organic compounds 225

##### 73.63. – b Electronic transport in nanoscale materials and structures

73.63.Fg Nanotubes 225

73.63.Rt Nanoscale contacts 1009

#### 74. Superconductivity

##### 74.20. – z Theories and models of superconducting state 317, 785

74.20.Mn Nonconventional mechanisms 785

74.20.Rp Pairing symmetries (other than s-wave) 785

##### 74.25. – q Properties of superconductors

74.25.Dw Superconductivity phase diagrams 785

##### 74.72. – h Cuprate superconductors 317

##### 74.78. – w Superconducting films and low-dimensional structures

74.78.Fk Multilayers, superlattices, heterostructures 785

74.78.Na Mesoscopic and nanoscale systems 941

#### 75. Magnetic properties and materials

##### 75.30. – m Intrinsic properties of magnetically ordered materials

75.30.Ds Spin waves 1063, 1099

##### 75.40. – s Critical-point effects, specific heats, short-range order

75.40.Gb Dynamic properties (dynamic susceptibility, spin waves, spin diffusion, dynamic scaling, etc.) 1063, 1064

##### 75.50. – y Studies of specific magnetic materials

75.50.Ee Antiferromagnetics 1063, 1064

##### 75.75. – c Magnetic properties of nanostructures 1009

##### 75.78. – n Magnetization dynamics

75.78.Jp Ultrafast magnetization dynamics and switching 1063, 1064

##### 75.85. + t Magnetoelectric effects, multiferroics 1063, 1077, 1089

#### 76. Magnetic resonances and relaxations in condensed matter, Mössbauer effect

##### 76.50. + g Ferromagnetic, antiferromagnetic, and ferrimagnetic resonances; spin-wave resonance 1063, 1089

#### 78. Optical properties, condensed-matter spectroscopy and other interactions of radiation and particles with condensed matter

##### 78.20. – e Optical properties of bulk materials and thin films

78.20.Fm Birefringence 1063, 1089

78.20.Ls Magneto-optical effects 1063, 1064

##### 78.30. – j Infrared and Raman spectra 1063, 1064

##### 78.67. – n Optical properties of low-dimensional, mesoscopic, and nanoscale materials and structures 337

- 79. Electron and ion emission by liquids and solids; impact phenomena**
- 79.20. – m Impact phenomena (including electron spectra and sputtering)**  
79.20.Eb Laser ablation 489
- 80. INTERDISCIPLINARY PHYSICS AND RELATED AREAS OF SCIENCE AND TECHNOLOGY**
- 81. Materials science**
- 81.05. – t Specific materials: fabrication, treatment, testing, and analysis**

96.50.S – Cosmic rays 501, 521
- 96.60. – j Solar physics** 631, 664  
96.60.Hv Electric and magnetic fields, solar magnetism 631, 643
- 97. Stars**
- 97.10. – q Stellar characteristics and properties**  
97.10.Gz Accretion and accretion disks 561, 1129
- 97.60. – s Late stages of stellar evolution (including black holes)**  
97.60.Lf Black holes 829
- 97.82. – j Extrasolar planetary systems** 817  
97.82.Jw Infrared excess; debris disks; protoplanetary disks; exo-zodiacal dust 1129
- 98. Stellar systems; interstellar medium; galactic and extragalactic objects and systems; the Universe**
- 98.35. – a Characteristics and properties of the Milky Way galaxy**  
98.35.Gi Galactic halo 829  
98.35.Jk Galactic center, bar, circumnuclear matter, and bulge (including black hole and distance measurements) 829
- 98.62. – g Characteristics and properties of external galaxies and extragalactic objects**  
98.62.Mw Infall, accretion, and accretion disks 1129

- 
- 98.65.–r Galaxy groups, clusters, and superclusters; large scale structure of the Universe** 1323
- 98.65.Cw Galaxy clusters 1323
- 98.70.–f Unidentified sources of radiation outside the Solar System**
- 98.70.Sa Cosmic rays (including sources, origin, acceleration, and interactions) 763
- 98.80.–k Cosmology** 817, 947, 948
