

Contents

561	Ultrahard nanomaterials: myths and reality V V Brazhkin	523
585	Mechanisms and kinetics of gravity separation of granular materials V N Dolgunin, A N Kudi, M A Tuev	545
605	Study of exoplanets by spectroscopic methods V E Panchuk, Yu Yu Balega, V G Klochkova, M E Sachkov	562
627	Silhouettes of invisible black holes V I Dokuchaev, N O Nazarova	583
648	Generalization of the k coefficient method in relativity to an arbitrary angle between the velocity of an observer (source) and the direction of the light ray from (to) a faraway source (observer) at rest V I Ritus	601
658	Identity of the mechanisms of Weibel and Alfvén-cyclotron plasma instabilities A S Dzarakhokhova, N P Zaretskii, A V Maksimychyev, L I Menshikov, P L Menshikov	611
664	Wormholes with entrances close to each other N S Kardashev, I D Novikov, S V Repin	617
669	In memory of Nikolai Semenovich Kardashev	622
671	Physics news on the Internet Yu N Eroshenko	625
