CONFERENCES AND SYMPOSIA

Introduction

Mesoscopic unification 105
V F Gantmakher, M V Feĭgel'man

1. Quantum dots and wells

**Interwell radiative recombination of a 2D electron gas
in electrically biased double quantum wells** 109
V B Timofeev, A V Larionov, J Zeman, G Martinez,
J Hvam, D Birkedal, K Soerensen

**Shakeup processes in a two-dimensional electron gas
in GaAs/AlGaAs quantum wells at high magnetic fields** 112
G Finkelstein, H Shtrikman, I Bar-Joseph

Excitonic molecules in InGaAs/GaAs quantum dots 115
V D Kulakovskii, M Bayer, M Michel, A Forchel,
T Gutbrod, F Faller

**Anomalous transport and luminescence of indirect excitons
in coupled quantum wells** 118
L V Butov

**A self-assembled InAs quantum dot used as a quantum microscope
looking into a two-dimensional electron gas** 122
T Ihn, A Thornton, I E Itskevich, P H Beton, P Martin, P Moriarty,
E Müller, A Nogaret, P C Main, L Eaves, M Henini

Physics news on the Internet 126
Yu N Eroshenko

Continued overleaf

2. The quantum Hall effect and noise in mesoscopic systems	
Capacitance spectroscopy of the fractional quantum Hall effect	127
S I Dorozhkin, M O Dorokhova, R J Haug, K Ploog	
Non-singular vortex-skyrmions in a two-dimensional electron system	131
S V Iordanskiĭ	
Microscopic derivation of the effective Lagrangian for skyrmions in an interacting two-dimensional electron gas at small g-factor	134
W Apel, Yu A Bychkov	
Nonlinear screening, and spin and cyclotron gaps in the 2D electron gas of GaAs/AlGaAs heterojunctions	138
V T Dolgoplov, A A Shashkin, A V Aristov, D Schmerek, W Hansen, J P Kotthaus, M Holland	
Effective action and Green's function for a compressible QH edge state	141
L S Levitov, A V Shytov, B I Halperin	
Recording zero-point current and voltage fluctuations	145
G B Lesovik	
Exchange effects in shot noise in multi-terminal devices	149
Ya M Blanter, S A van Langen, M Büttiker	
3. Quantum chaos and resonant tunnelling	
Signatures of quantum chaos in the magneto-excitonic spectrum of quantum wells	153
L Viña, M Potemski, W I Wang	
Image of local density of states in differential conductance fluctuations in the resonance tunnelling between disordered metals	156
V I Fal'ko	
Resonant tunnelling through a single-electron transistor	159
J König, H Schoeller, G Schön	
Coulomb-like mesoscopic conductance fluctuations in a 2D electron gas near the filling factor $\nu = 1/2$	164
Z D Kvon, E B Olshanetskiĭ, G M Gusev, J C Portal, D K Maude	
4. Quasi-1D systems, networks and arrays	
Electrical transport through micro-fabricated charge-density-wave structures	167
H S J van der Zant, O C Mantel, P W F Rutten, C Dekker	
Flow diagram for impurity scattering in Tomonaga–Luttinger liquids	171
Y Oreg, A M Finkel'stein	
Ground states in one-dimensional electron systems	175
W Hansen, D Schmerek, C Steinebach	

Contents continued

Pumping of energy into a mesoscopic ring. Exactly solvable model L Gorelik, S Kulinich, Yu Galperin, R I Shekhter, M Jonson	178
Interference effects in mesoscopic disordered rings and wires M Pascaud, G Montambaux	182
Electrons in quasi-one-dimensional conductors: from high-temperature diffusion to low-temperature hopping M E Gershenson, Yu B Khavin, A L Bogdanov	186
5. Mesoscopic superconductivity and the Coulomb blockade	
Phase-coherent phenomena in S/N/S structures A F Volkov, V V Pavlovskii	191
Sign memory of the Ruderman–Kittel interaction in disordered metals and magnetic coupling in mesoscopic metal/ferromagnet layered systems B Spivak, A Zyuzin	195
Coulomb effects in a ballistic one-channel S-S-S device D A Ivanov, M V Feigel'man	197
Room temperature molecular single-electron transistor E S Soldatov, V V Khanin, A S Trifonov, S P Gubin, V V Kolesov, D E Presnov, S A Iakovenko, G B Khomutov, A N Korotkov	202
Sensing of dynamic charge states using single-electron tunneling transistors V A Krupenin, S V Lotkhov, H Scherer, A B Zorin, F-J Ahlers, J Niemeyer, H Wolf	204
Localization of quasiparticles in an NS structure A V Shytov, P A Lee, L S Levitov	207
6. Superconductor–metal–insulator transitions	
The metal–insulator transition in two-dimensional system at zero magnetic field V M Pudalov	211
Superconductor–insulator transitions and insulators with localized pairs V F Gantmakher	214
Superconductor–insulator transition in the disordered Bose condensate: a discussion of the mode-coupling approach A Gold	217
Mesoscopic phenomena in disordered superconductors A Frydman, E P Price, R C Dynes	220
Low-temperature resistivity of underdoped cuprates A N Lavrov, V F Gantmakher	223
Quantum fluctuations and dissipation in thin superconducting wires A D Zaikin, D S Golubev, A van Otterlo, G T Zimányi	226
